

Lab 5: Design Research Instruments

Tasks

1. Invite members of other groups to test your interviews or questionnaires. Do not ask for critique or feedback. Observe how participants respond to questions and look for opportunities for improvement. Take notes.
2. Explain to members of the other group your project proposal and the goals of your research instruments. Ask for feedback and suggestions for improvement.
3. Go back to your groups. Discuss with your teammates what modifications you should apply to the current instruments. Reach consensus and summarize the changes. Feel free to continue the discussions after tutorial
- 4.

Submission

This is a group activity. Please the Lab 5 assignment via the Discussion boards

- a. your current draft research instrument.
- b. a short description indicating if they made any changes after receiving the feedback.

Due on end of day, 11:59pm.
